

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1.-26 (Canceled)

27. (Previously presented) A DNA sequence encoding a polypeptide comprising at least one liver stage-specific T cell epitope of *P. falciparum* Liver Stage Antigen (LSA).

28. (Currently amended) A DNA according to claim 27, wherein said polypeptide has an amino acid sequence selected from the group consisting of the amino acid sequence of Figure 9 (SEQ. ID NO.:43) and the amino acid sequence of Figure 10 (SEQ. ID NO.:47).

29. (Previously presented) A DNA encoding a polypeptide consisting of amino acid sequence SEQ ID NO: 19, 20, 21, 22 or 23 or an epitope effective portion thereof.

30. (Previously presented) A DNA according to claim 29, wherein said polypeptide is preceded by one or more of the amino acid sequences of SEQ ID NOs: 2-18, wherein X₁ is Ser or Arg; X₂ is Glu or Asp; X₃ is Arg or Leu; and X₄ is Glu or Gly.

31. (Previously presented) A DNA according to claim 27, wherein said polypeptide has an amino acid sequence consisting of the amino acid sequence of Figure 7.

32. (Previously presented) A DNA encoding polypeptide comprising at least one epitope of *P. falciparum* Liver Stage Antigen (LSA), wherein said polypeptide has an amino acid sequence consisting of the first 153 amino acids of the amino acid sequence of SEQ ID NO: 37, or an epitope effective portion thereof.

33. (Previously presented) A DNA according to claim 32, wherein said polypeptide is preceded by one or more of the amino acid sequences of SEQ ID NOs: 2-18, wherein wherein X_1 is Ser or Arg; X_2 is Glu or Asp; X_3 is Arg or Leu; and X_4 is Glu or Gly.

34. (Previously presented) A DNA according to claim 32, wherein said polypeptide is followed by one or more of the amino acid sequences of SEQ ID NOs: 2-18, wherein wherein X_1 is Ser or Arg; X_2 is Glu or Asp; X_3 is Arg or Leu; and X_4 is Glu or Gly.

35. (Previously presented) A DNA according to claim 27, further comprising DNA encoding at least one B epitope from a liver-stage specific protein produced by *P. falciparum*.

36. (Previously presented) A DNA encoding a polypeptide consisting of the last 279 amino acids of the amino acid sequence of SEQ ID NO: 45 or an epitope effective portion thereof.

37. (Previously presented) A DNA polypeptide according to any one of claims 29, 32 or 44, wherein said polypeptide is linked to one or several amino acids of one or more peptides other than a *P. falciparum* Liver Stage Antigen.
